

## AMA's Free Online Tool

### **Don't write off claim denials---fight for accurate payment with AMA's free online tool**

**Streamline your practice's process of reviewing and appealing claims** that have been inappropriately paid or denied. For practices that submit claims electronically, there's now a free online tool to help you secure accurate payment from health insurers for inappropriately denied claims.

With the Claims Workflow Assistant from the American Medical Association (AMA) Practice Management Center, you can look up the reasons health insurers reported for denying claims on the electronic remittance advices (ERAs) you receive. Then, you can determine the best steps for your practice to reverse the denials. The Claims Workflow Assistant even helps you get started with recommended workflows for top denials and provides numerous template appeal letters that AMA members can easily modify to use in their practices.

Visit [www.ama-assn.org/go/healthatclaim](http://www.ama-assn.org/go/healthatclaim) to watch a **free archived webinar** on reviewing and appealing claims, access the Claims Workflow Assistant and its template appeal letters, and pledge to do your part to heal the claims process by reviewing and appealing claims as appropriate.
